# COMPANY

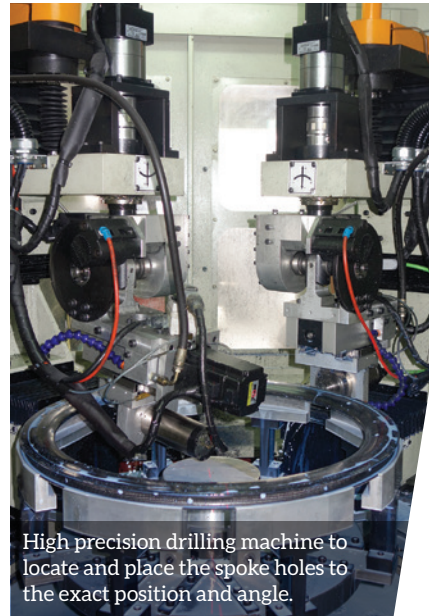

## About us

### We test what we do!

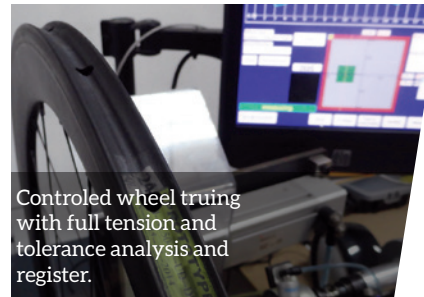

The performance, efficiency and reliability are our base work priorities. Though lightweight, the stiffness of PROTOTYPE products are tested through a computationally intensive process to the limit, proven by elite athletes who have won more than 100 national and international titles, including the World Champion.

PROTOTYPE is totally committed with after sales support, giving technical solutions to allow find practical and simplified options.

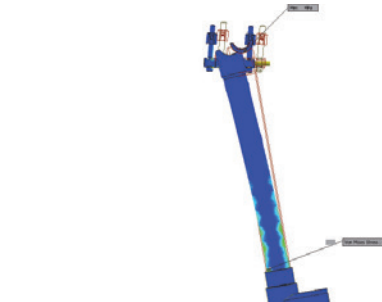

We know where we are and where we want to go.

High precision drilling machine to locate and place the spoke holes to the exact position and angle.

Controlled wheel truing with full tension and tolerance analysis and register.

Finite element analysis (FEA) to calculate stresses and displacements of component displacements, strains under internal and external loads.

With the analysis results, we can catch design flaws and optimize features at the drawing stage.

CHAMPIONS  
ARE POWERED  
BY PROTOTYPE

*All wheels are built with unmatched attention to detail, we use high-precision tools, specially designed by us. We can offer a ride quality and durability that cannot be matched by a stock machine-built set.*

## Handlebar

*The ability to absorb vibrations is critical to reduce fatigue while stiffness is essential for the perfect control of a bike. Though very light, Physis handlebar is rigid and strengthened in grip areas.*

Length: 660mm/710 mm | 730mm (Team)  
Material: Aluminum Light Force  
Weight: 270gr | 210gr (Team)

MSRP: 53 € | 84 € (Team)

Ref. 660: P31.11.001

Ref. 710: P31.11.002

Ref. Team: P31.11.003

## Stem

*Being the stem a key element for the perfect fit for riders' position, Physis stem distinguishes itself by its design, construction materials and vibration absorption capacity.*

Length: 6° and 17° > 80 mm ~ 130mm  
Material: Aluminum Light Force  
Bolts: Titanium  
Weight: 6° - 98gr (90mm) / 17° - 100gr (90mm)

MSRP: 68 €

Ref. 17°: P08.11.010

## Seat Clamp

Dimensions: 31.8 / 34.9 / 36.0 / 38.2  
Material: Aluminum Light Force  
Weight: 5.9gr (38.2)

Available colors

MSRP: 20 €

Ref. 31.8: P04.01.017

Ref. 34.9: P04.01.018

## Bar Ends

Length: 75mm  
Material: Aluminum Light Force  
Weight: 46gr

Available colors

MSRP: 29.50 €

Ref. BK: P25.11.005

## Grips

Material: 100% Silicone  
Weight: 84gr - Comfort / 59gr - Sport

Available colors

MSRP: 18€ (Comf. or Sport)

Ref. BK: P50.01.015

## Seat Post

Length: 410 mm: 100-310mm  
Material: Aluminum Light Force  
Weight: 27.2 x 410 mm > 205 gr  
31.6 x 410 mm > 167 gr  
30.9 x 410 mm > 185 gr

Available colors

MSRP: 95 €

Ref. 27.2: P23.11.004

Ref. 31.6: P23.11.001

Ref. 30.9: P23.11.007

## COMPONENTS

## BOTTOM BRACKET

Our bottom brackets feature high quality sealed cartridge bearings

*The PROTOTYPE bottom bracket is a significant upgrade to any OEM bottom bracket. High quality aluminium material CNC machined cups and the special bearings offer longer bearing life, smoother operation and increase the performance.*
